There is a new plug design for 07 is complete and ready for purchase. They are a little heavier so they sit in the water at around 75 degrees. This makes them easier to work and you can work them slower. They have already have been proven to work this fall. The largest weighting in at 37lbs taken by George Lechner. Pictures soon to come. They are 9" long and weight in at 3 oz. There are currently a few colors available but feel free to contact us with your suggestions. [Click here for more:](#)
